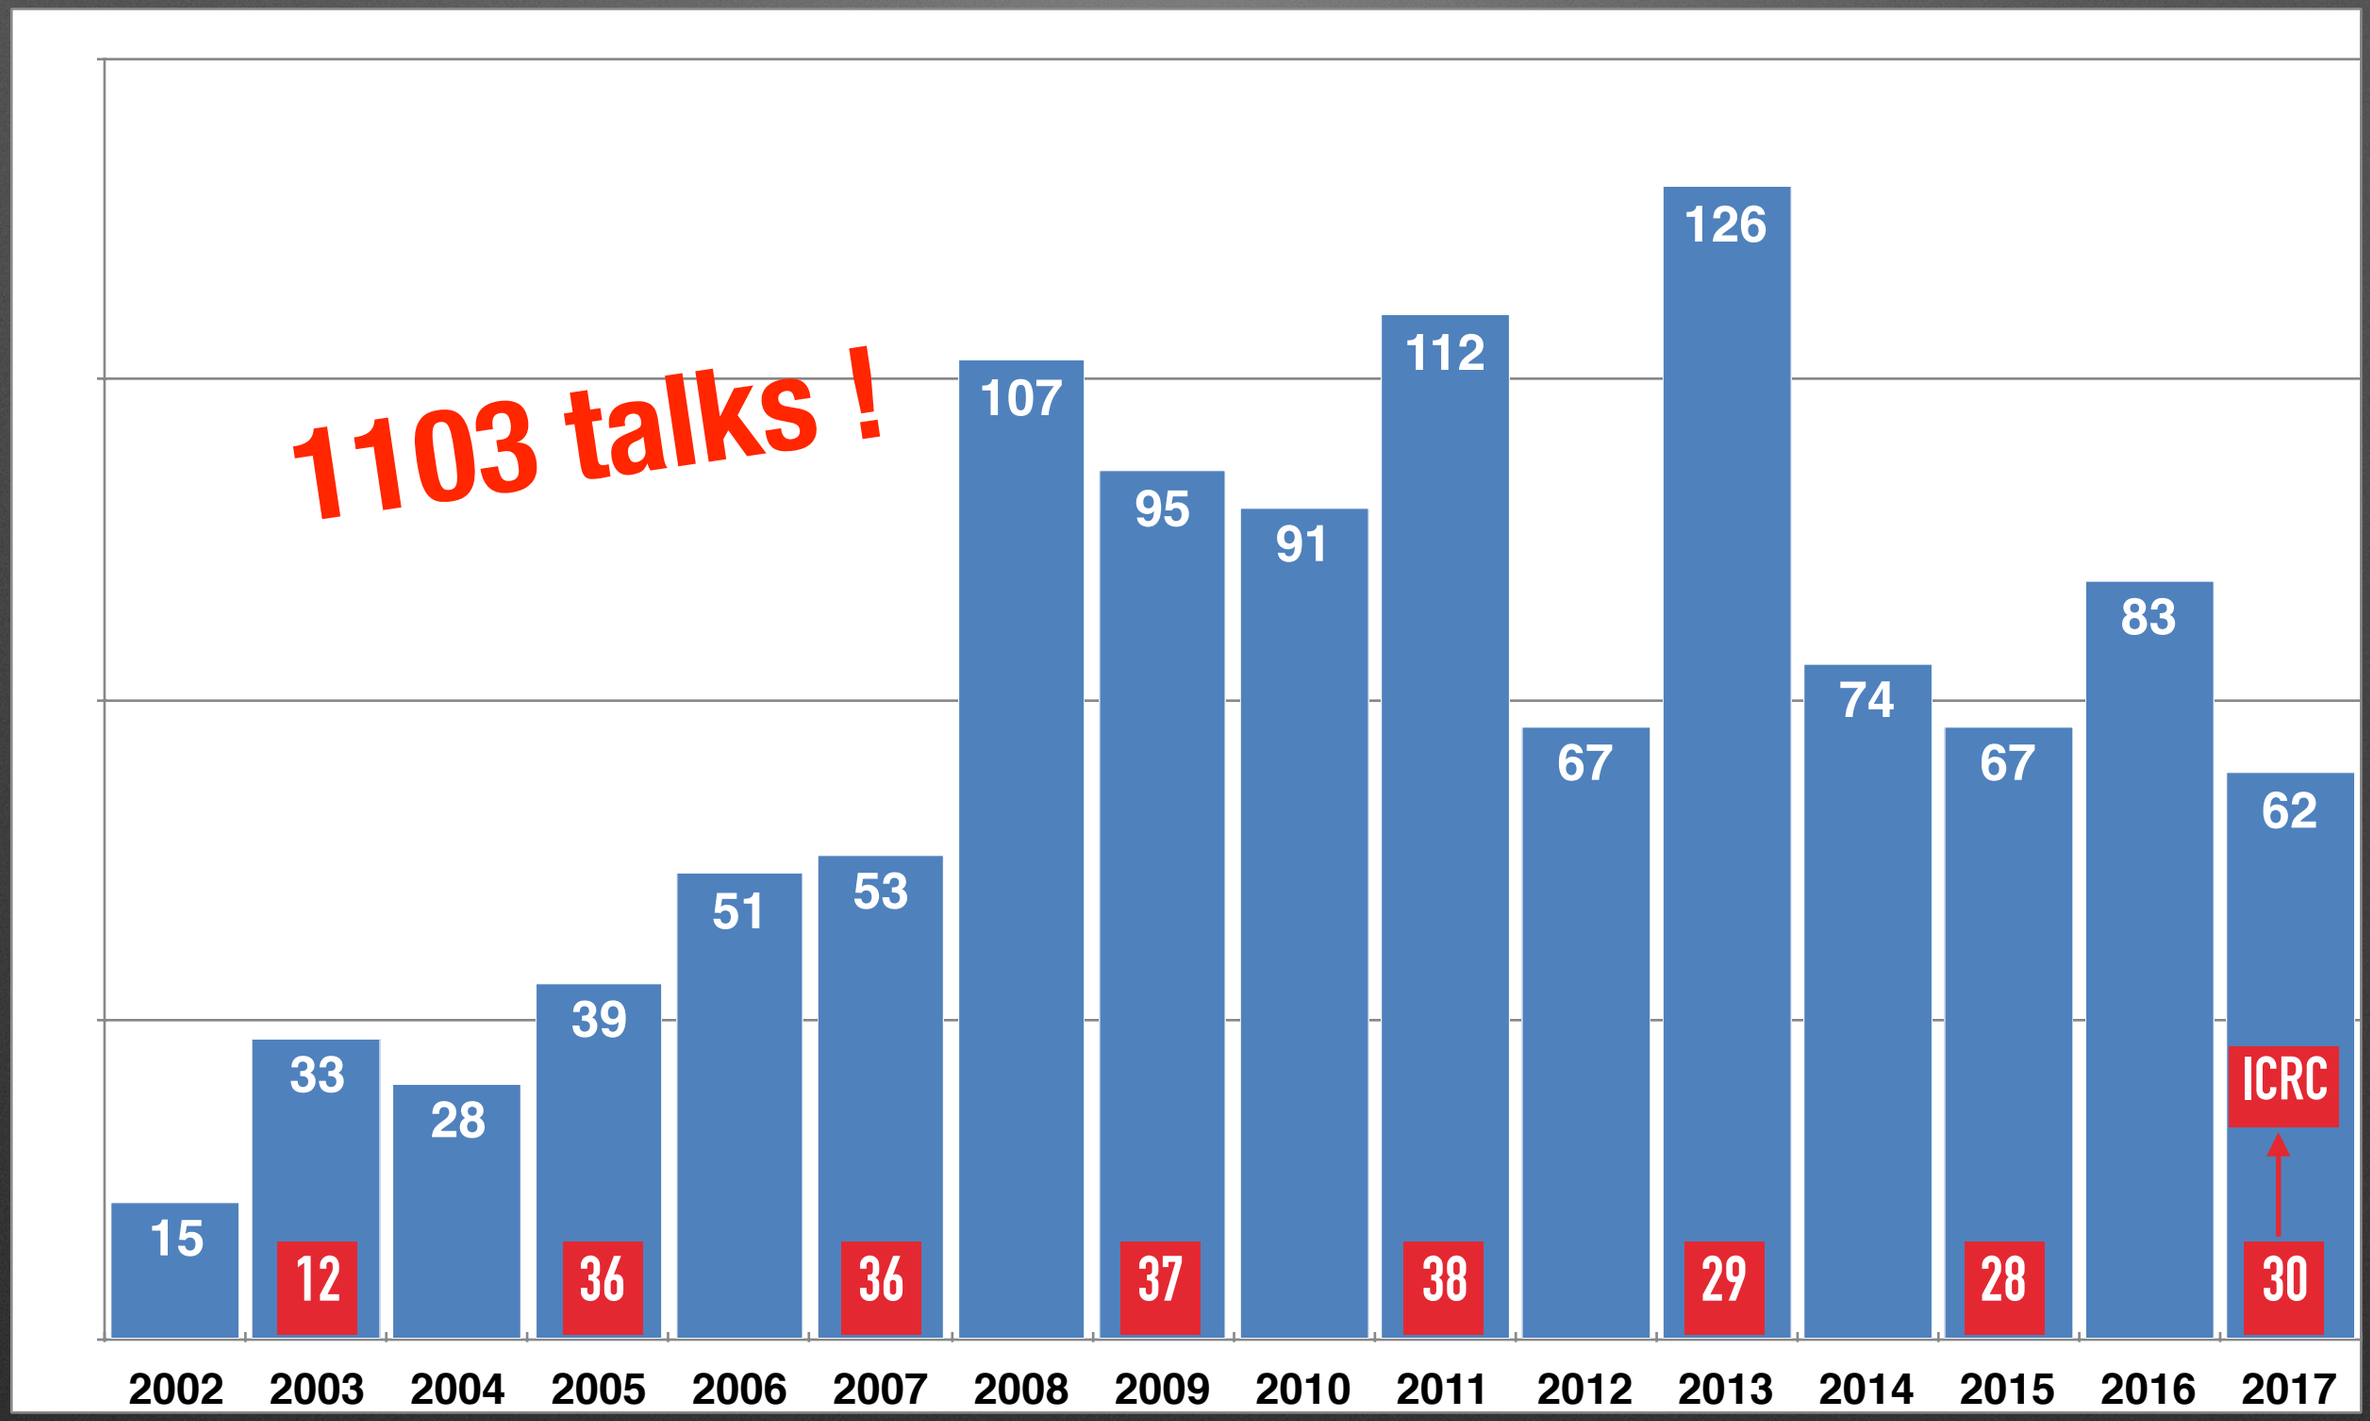
Report from the Conference Committee

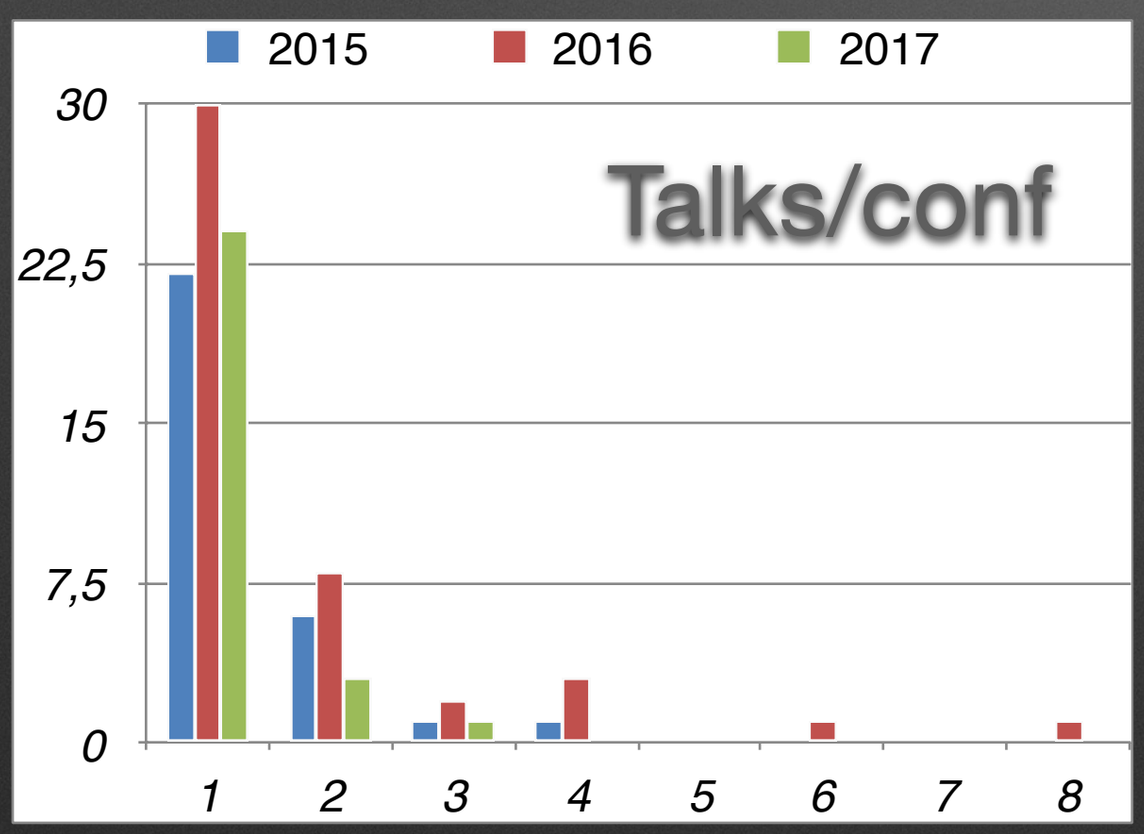
Antonella Castellina
Vitor de Souza
Isabelle Lhenry-Yvon
Miguel Mostafa

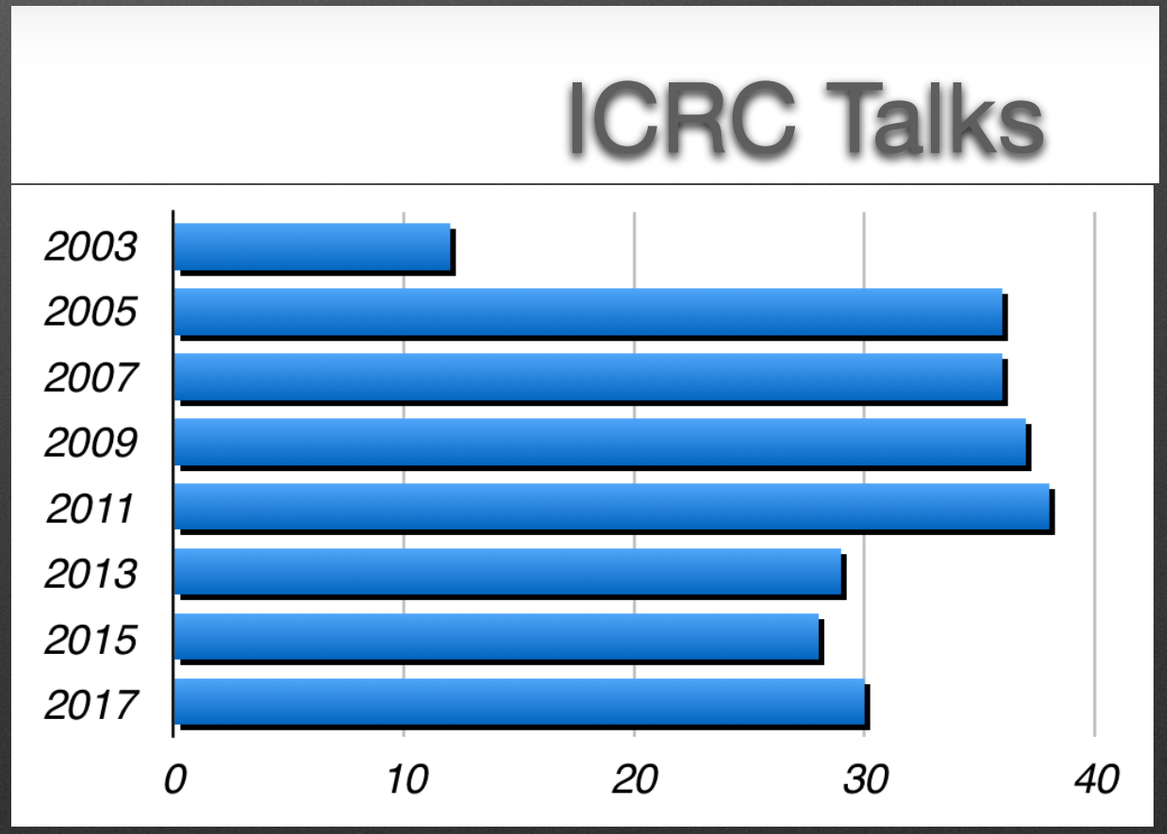
Talks per year - Grandtotal



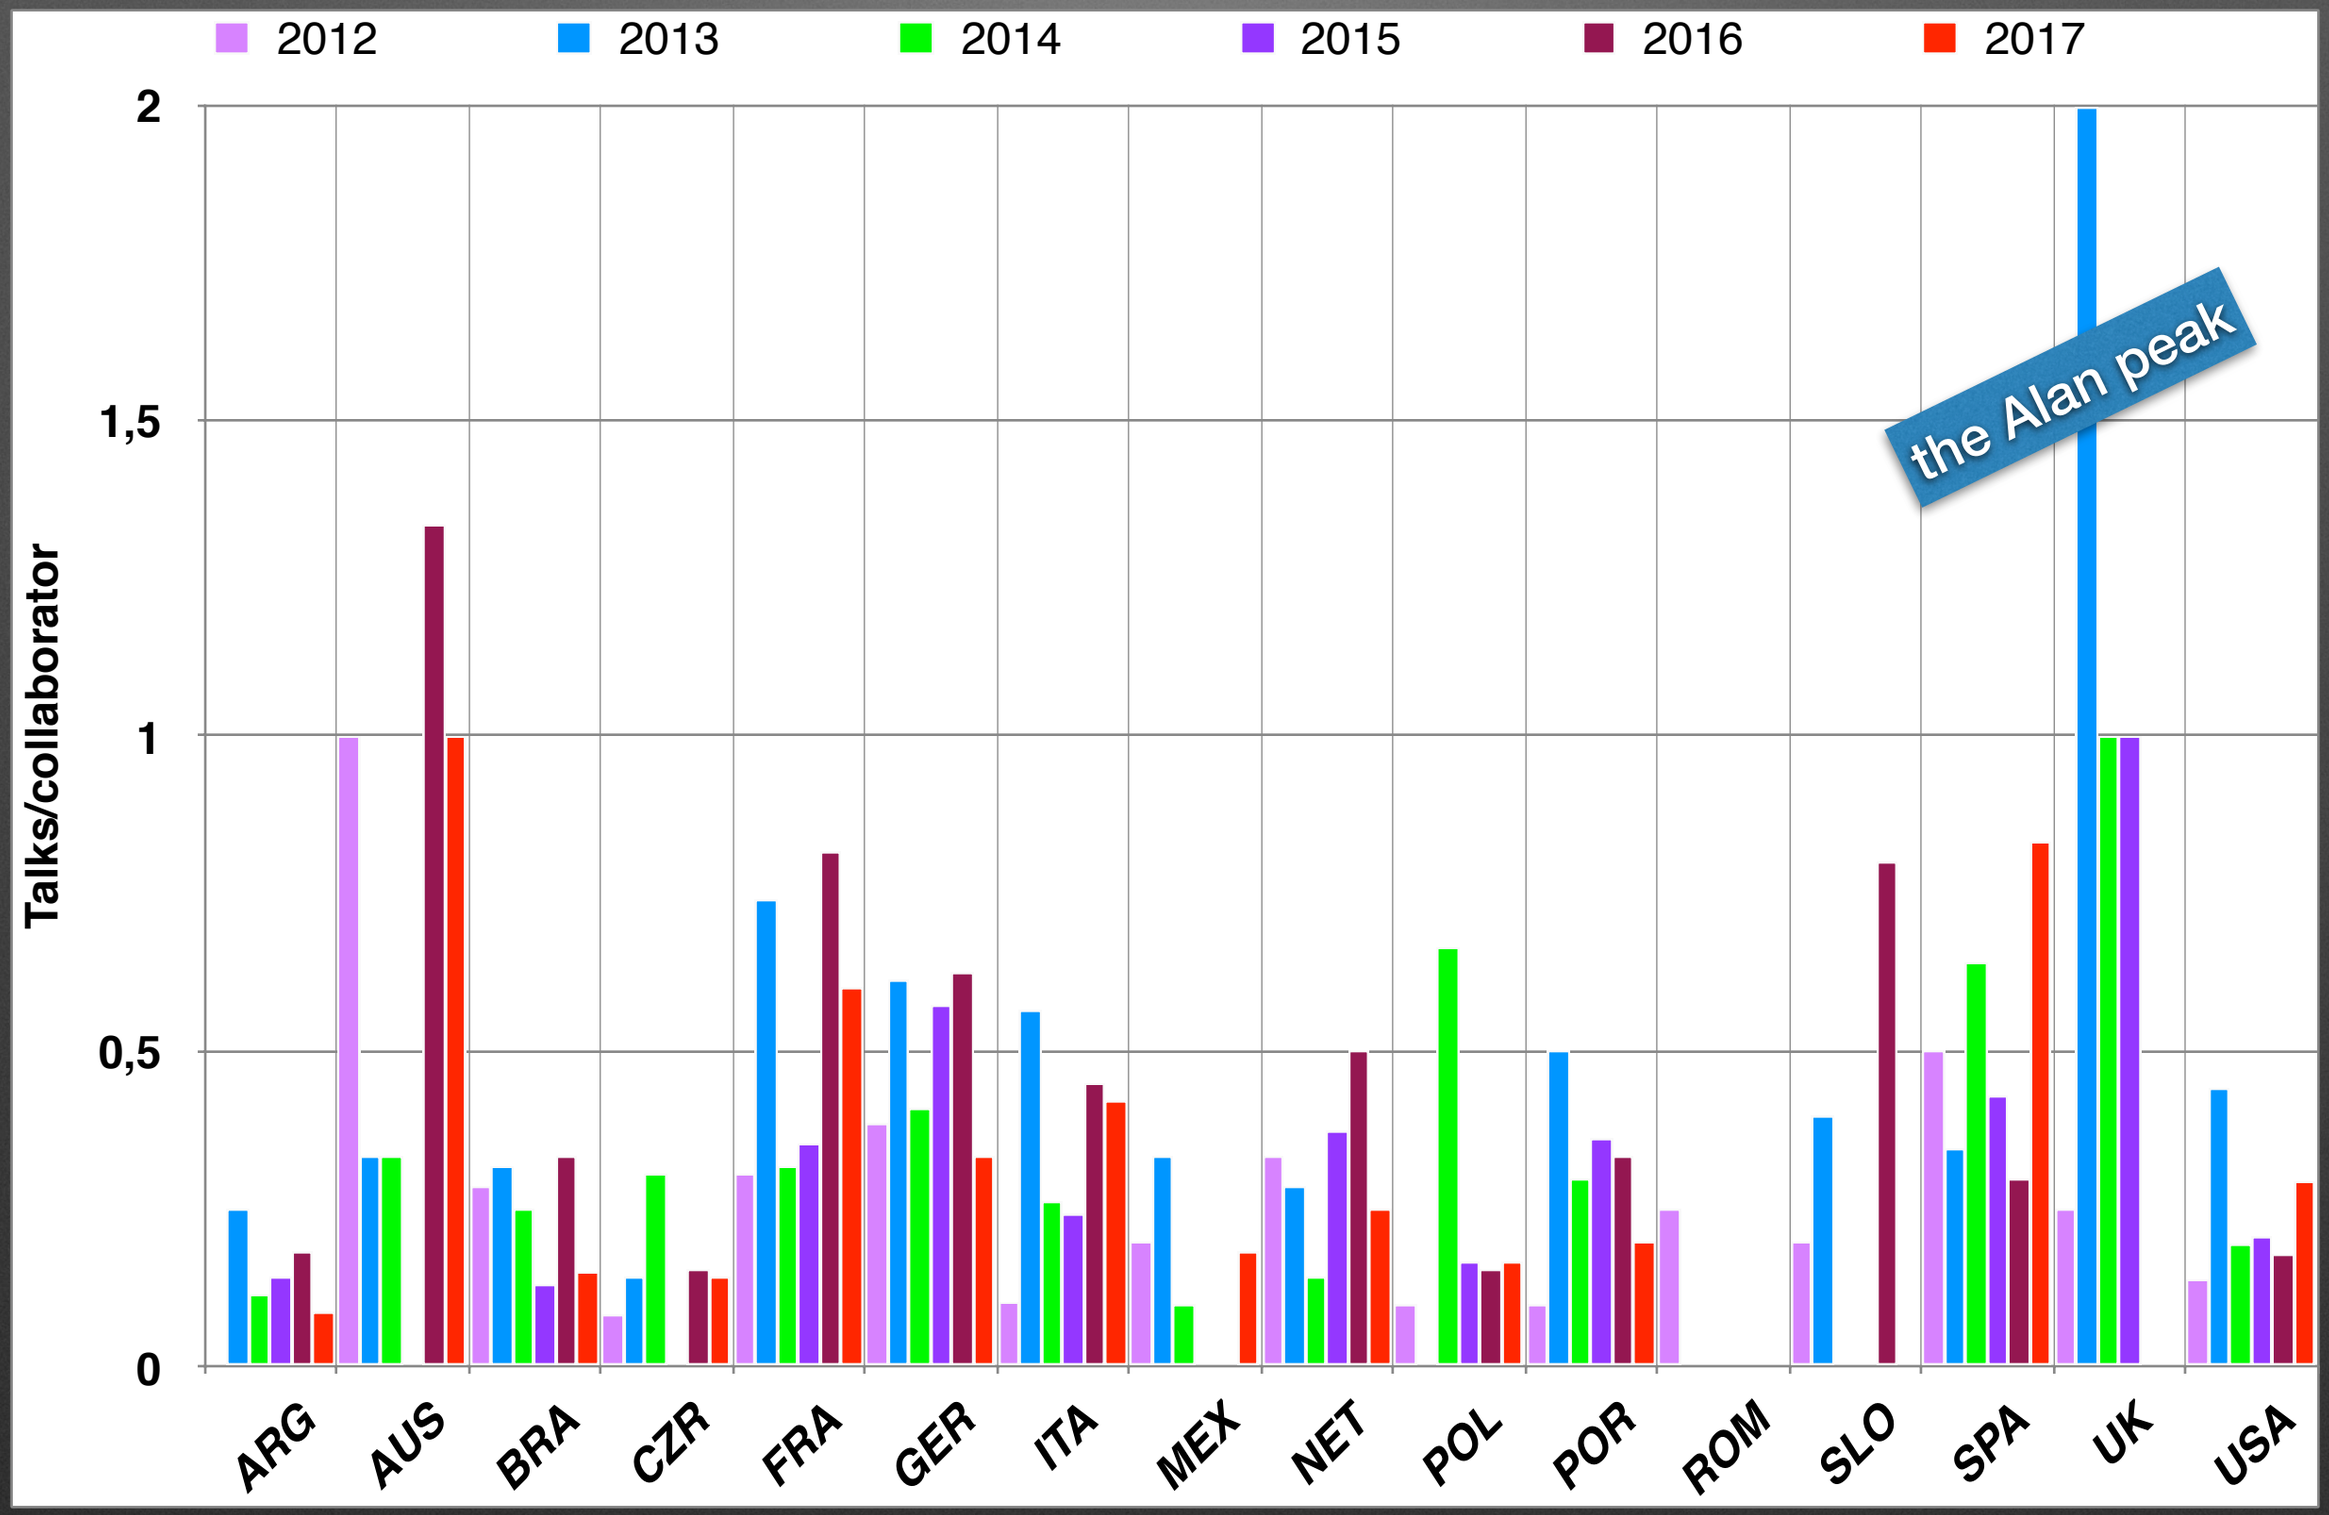
General comments about 2017

- 30 ICRC talks + 32 more conferences
- odd years: no CRIS, ARENA, UHECR where we have generally many talks
- INCREASINGLY difficult to find candidates
- talks on UHECRs in conferences devoted to theory/GW/DM/particle physics are not foreseen for all events of the series
- LSA and neutrino follow-up results discussed in many “local” talks… more to come in 2018 !

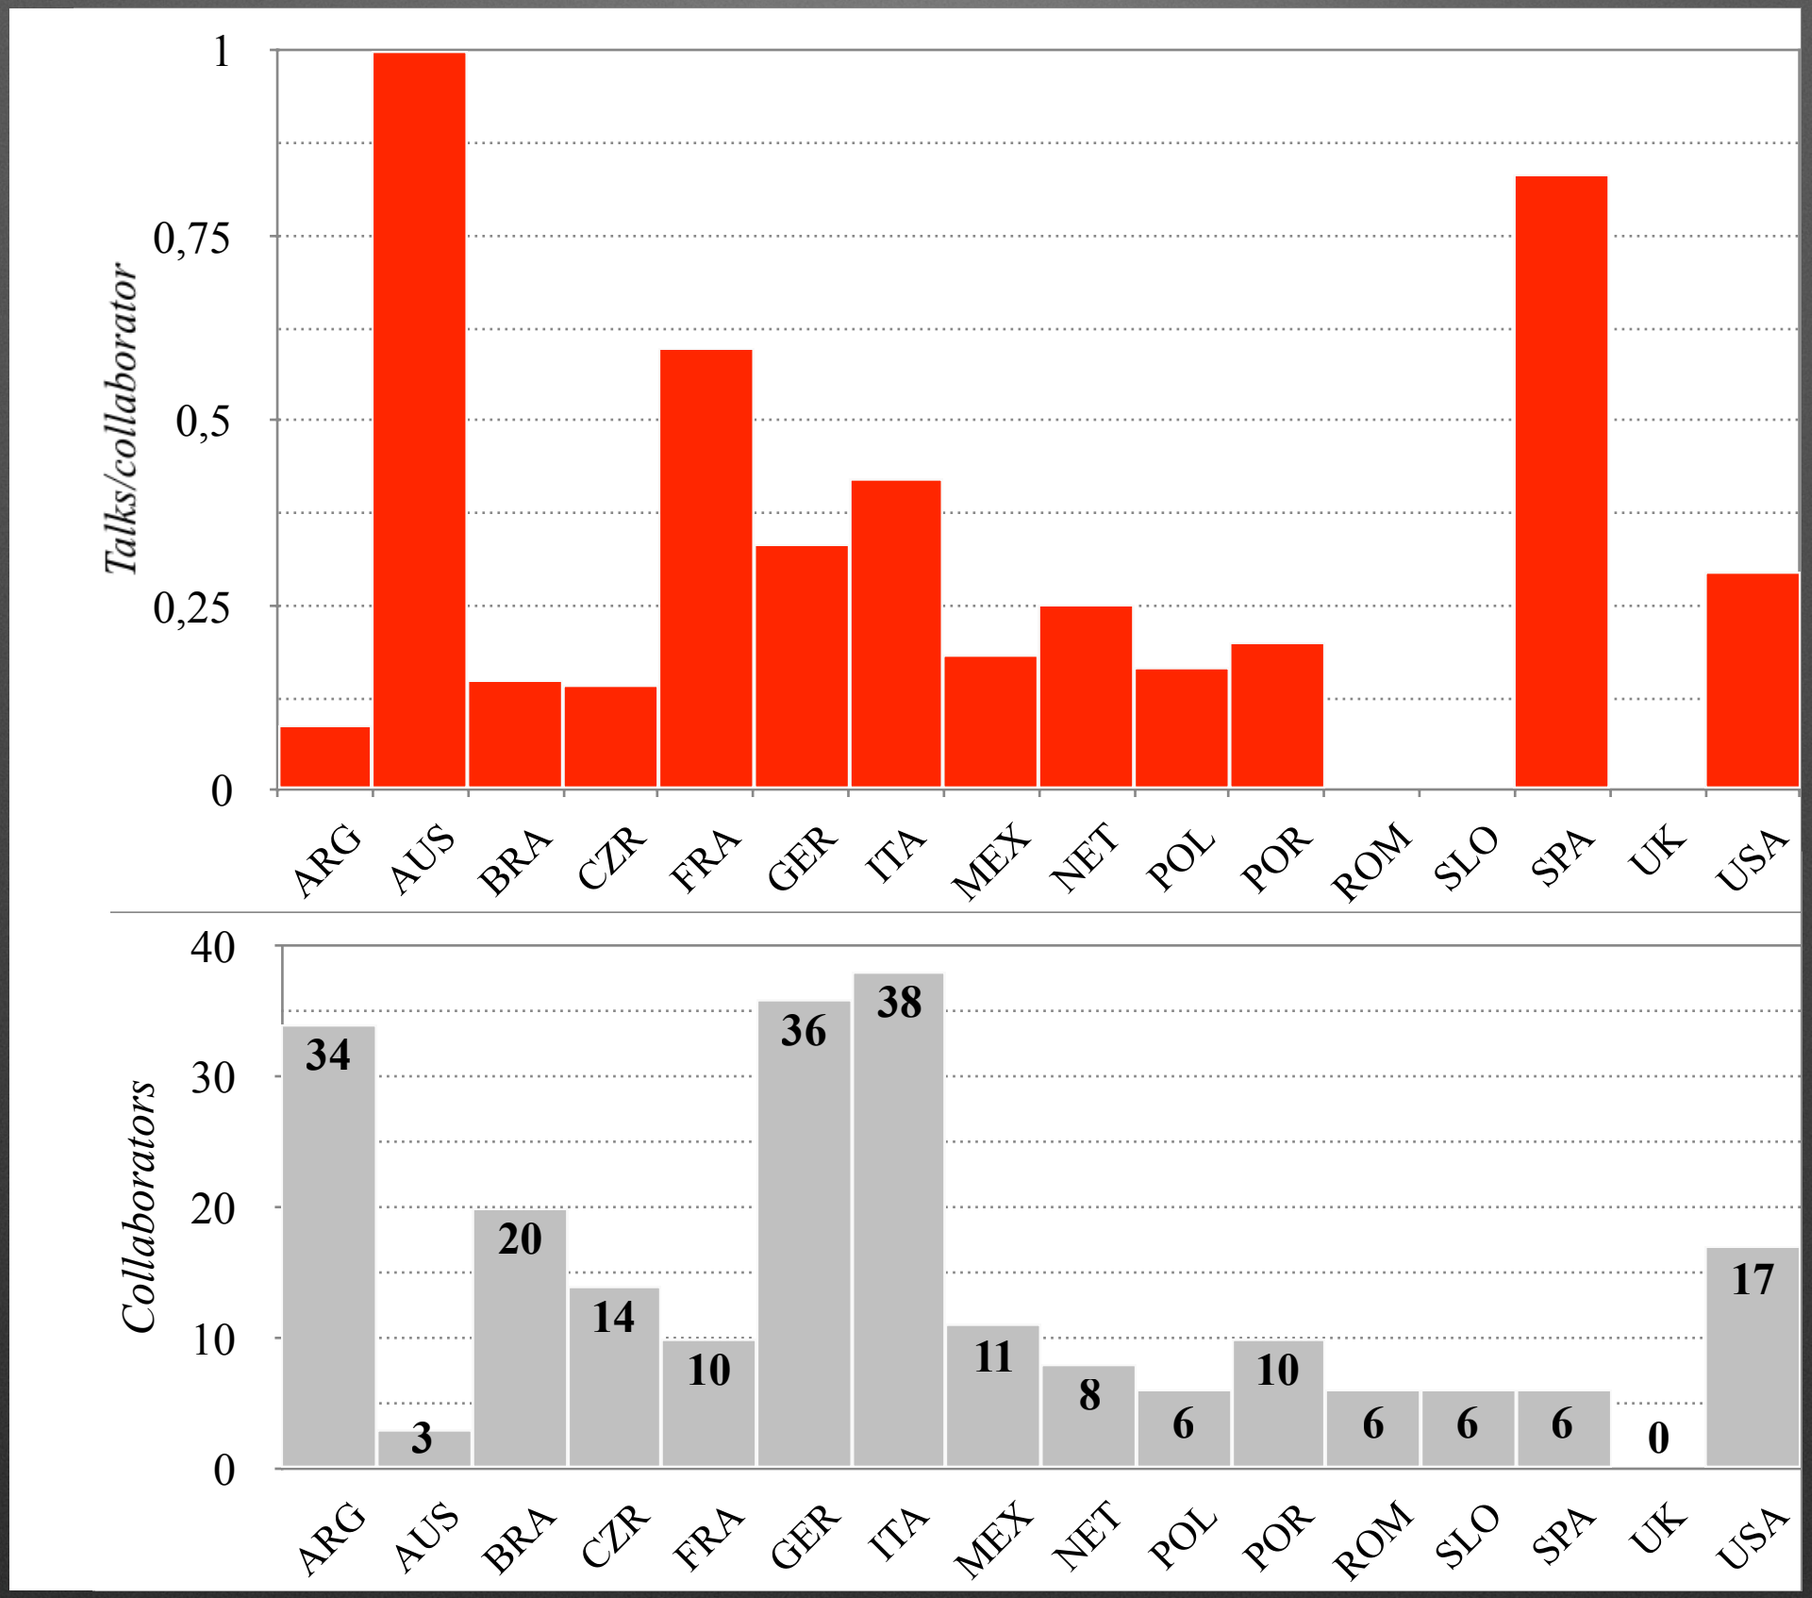




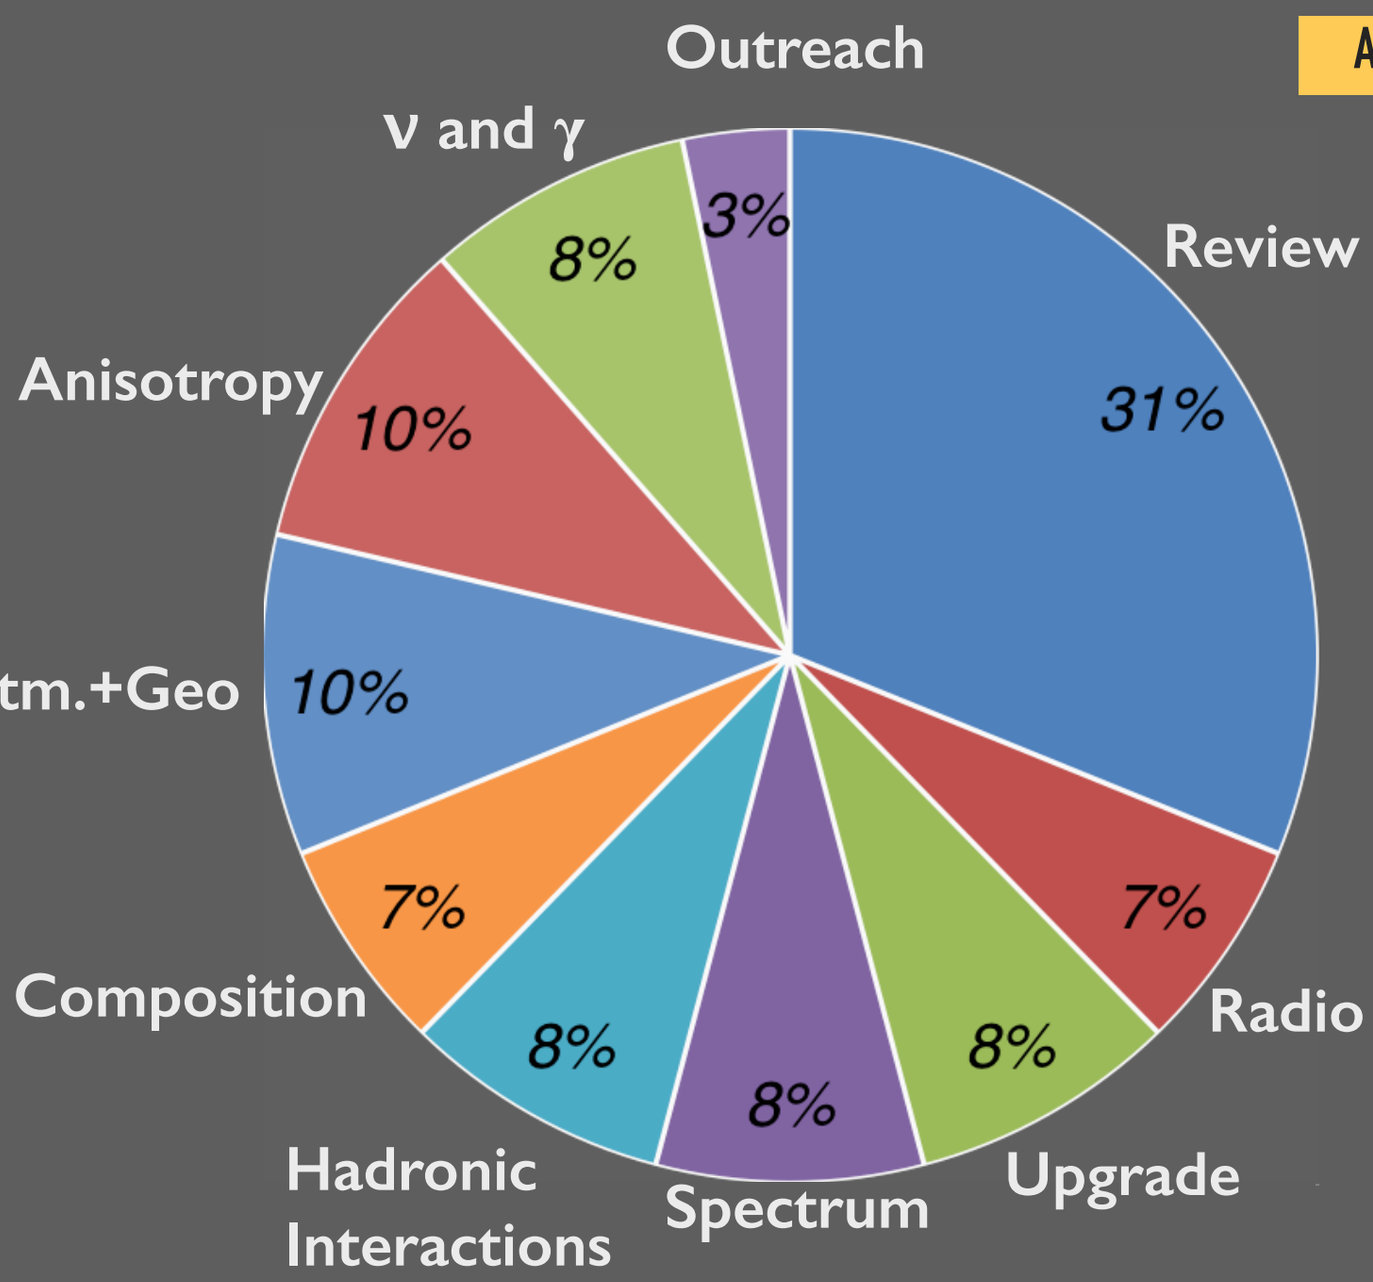
Talks per collaborator vs Country in the years



Talks per collaborator vs Country - 2017



Number of talks per subject in 2017



For all cases

- **only published results can be presented at conferences/workshops/etc.**
  There have been exceptions, generally linked to "almost ready for publication" results, but each case must be discussed to take a final decision

- **National Conferences : inform the CC about speaker and topic. NO interference from the CC**
- **International Conferences : the CC appoints a speaker but of course you can volunteer or suggest names from your group**
- **Invited talks: inform the CC immediately. No interference**

before being submitted !!!

The title and abstract must be discussed and approved by the corresponding task leaders before being sent to the CC
The abstract MUST BE sent to the CC, also in case of SAL contributions
The general rules for Auger papers MUST BE followed (acronyms, description, etc.)

For the upgrade

- ✓ only the “official” upgrade choices can be presented as “AugerPrime”
- ✓ R&D tests and other proposals for the upgrade must be considered as SAL

contributions

- ✓ references you can cite for the Upgrade

“The Pierre Auger Observatory Upgrade” - Daniele Martello
“New electronics for the surface detectors of the PAO” - T.Suomijarvi
“The dynamic range of the AugerPrime Surface Detector” - A.Castellina
“Scintillator detectors of AugerPrime” - R.Smida
“First results from the AugerPrime Engineering Array” Z.Zong

Contributions to the 35th ICRC, Busan, 2017
arXiv:1708.06592

The Pierre Auger Observatory Upgrade “AugerPrime”
The Pierre Auger Coll.
